

Bridal beauty in Delhi is **broken**. We built *Shringar AI* to fix it.

Finding a great makeup artist for your wedding means scrolling Instagram for hours, chasing WhatsApp confirmations, and hoping the look matches the price. Salon owners lose bookings daily to discovery friction. There's no trusted marketplace for either side — until now.

"A personal bridal expert in every bride's pocket — and a digital storefront that fills every artist's calendar."

◆ THE PROBLEM, ON BOTH SIDES

■ Brides

Fragmented, stressful discovery

No single place to compare artists, styles, or prices. Bookings are uncertain and the stakes couldn't be higher.

■ Artists

Invisible without a storefront

Talented artists rely on word-of-mouth, lose high-intent brides, and waste time on back-and-forth enquiries.

◆ KEY FEATURES

★ AI bridal stylist

Personalised look in seconds

◆ Instant booking

Confirm slots in one tap

■ Smart filters

Budget, style, occasion
